

## Next Level Kitchen Storage for Hideaway Bins.

**Client: Hideaway Bins**

### **Background:**

Hideaway Bins is an Auckland-based manufacturer of innovative kitchen storage solutions.

### **Challenge:**

They require high-quality, precision sheet metal components for their products, and were looking for a partner who could offer top-quality manufacturing services, cost-effective production and reliable delivery.

### **The Solution:**

Replika stepped in to offer our expertise and state-of-the-art technology, leveraging our knowledge and advanced equipment to provide the following services:

#### **Consultation and Prototyping**

Replika advised on the optimal manufacturing methods and materials for Hideaway Bins' products and produced prototypes for evaluation and refinement.

#### **Efficient Manufacturing**

Replika streamlined their production process by utilising our Trumpf TruMatic Combination Punch / Laser Cut machine, which enabled us to cut and punch sheet metal components in a single step. This saved both time and money, enhancing overall efficiency.

#### **Precision Folding and Laser Welding**

Replika ensured the quality of Hideaway Bins' components by employing precise folding and laser welding techniques, resulting in strong, reliable products.

#### **Seamless Delivery to Powder Coater**

After the manufacturing process, Replika arranged for the finished components to be transported to Hideaway Bins' nominated powder coater for painting, ensuring a smooth, uninterrupted production flow.
